Movable weight shifts the clubhead's CG horizontally toward either the heel, to promote a draw, or toward the toe, to promote a fade.. That's what makes SLDR our longest driver ever SLDR's CG location is both low and forward, due in large part to the large, 20-gram sliding weight on the sole.. It takes as little as ten seconds And the sole is marked with the words "fade" at the toe-end of the track and "draw" at the heel-end of the track to make it clear where you should position the weight to promote the shot-shape you want.. And the clean design of SLDR's movable weight mechanism, including the single, blue weight and the track it slides in makes its appearance equally striking.. We've discovered that moving the CG forward promotes more ball speed and less spin.

SLDR is available in three lofts – 9.5°, 10.5° and HL. Aesthetically, SLDR's confluence of shape, color and visual accents make it one of the most visually compelling clubs we've ever created.. Its striking modern-classic shape, charcoal-gray crown and chrome "button-back" all adds up to a remarkably beautiful appearance at address.. For years it's been accepted that low and back was the ideal CG location for a driver.. That promotes a dramatic leap in distance. We've found this is not the best way to generate the most distance. Long distance comes from combining of fast ball speed, high launch-angle and low spin-rate.. The SLDR weight slides on the track and never comes loose from the clubhead. To slide the weight to any of the 21 positions on the track, simply loosen the screw, slide the weight, then tighten the screw.. We've found this is not the best way to generate the most distance. Long distance comes from combining of fast ball speed, high launch-angle and low spin-rate.. To launch the ball on a high enough angle to maximize distance, we've discovered that most golfers benefit

In addition to the low-forward CG benefits, the SLDR weight also represents a complete reinvention of movable weight, making it more effective and easier to use. 773a7aa168 [Kerbal Space Program Full download](#)
